LEED New Construction & Renovation

MR Credit 2 – Construction Waste Management

The primary material in all aluminum dampers and louvers manufactured by Arrow United Industries, Division of Mestek, Inc., is 100% recyclable aluminum type 6063-T5, 6063-T52, or 6061-T6, which contributes to the MR2.1 credit. (1 point)

MR Credit 4 – Recycled Content

The aluminum materials used for all damper and louver products manufactured by Arrow United Industries, Division of Mestek, Inc., contains 40% pre-consumer recycled content and 15% post-consumer recycled content, which equates to a total recycled content of 35% per the LEED calculation procedure.

This contributes to the MR4.1 and MR4.2 criteria.

MR Credit 5 – Local/Regional Materials

All products are sold, fabricated and shipped from:
Arrow United Industries, Division of Mestek, Inc.
450 Riverside Drive
Wyalusing, PA 18853

All job locations within 500 miles of our location contribute to a 20% local manufacturing goal for Credit MR5.1 (1 point).

Earl C. Lewis, President
